

Cryptexonline E-Security Policy

When purchasing from Cryptexonline your financial details are passed through a secure server using the latest AES 256-bit SSL (secure sockets layer) encryption technology.

128-bit SSL encryption is approximated to take at least one trillion years to break, and is the industry standard.

It is important to note however that not all Internet browsers are configured or capable of establishing connections using 256-bit AES typically these will operate at the industry standard of 128-bit AES.

If you have any questions regarding our security policy, please contact our customer support centre at support@cryptexonline.com.
